

# PLANT DESIGN RUNNING IN OUR VEINS ...

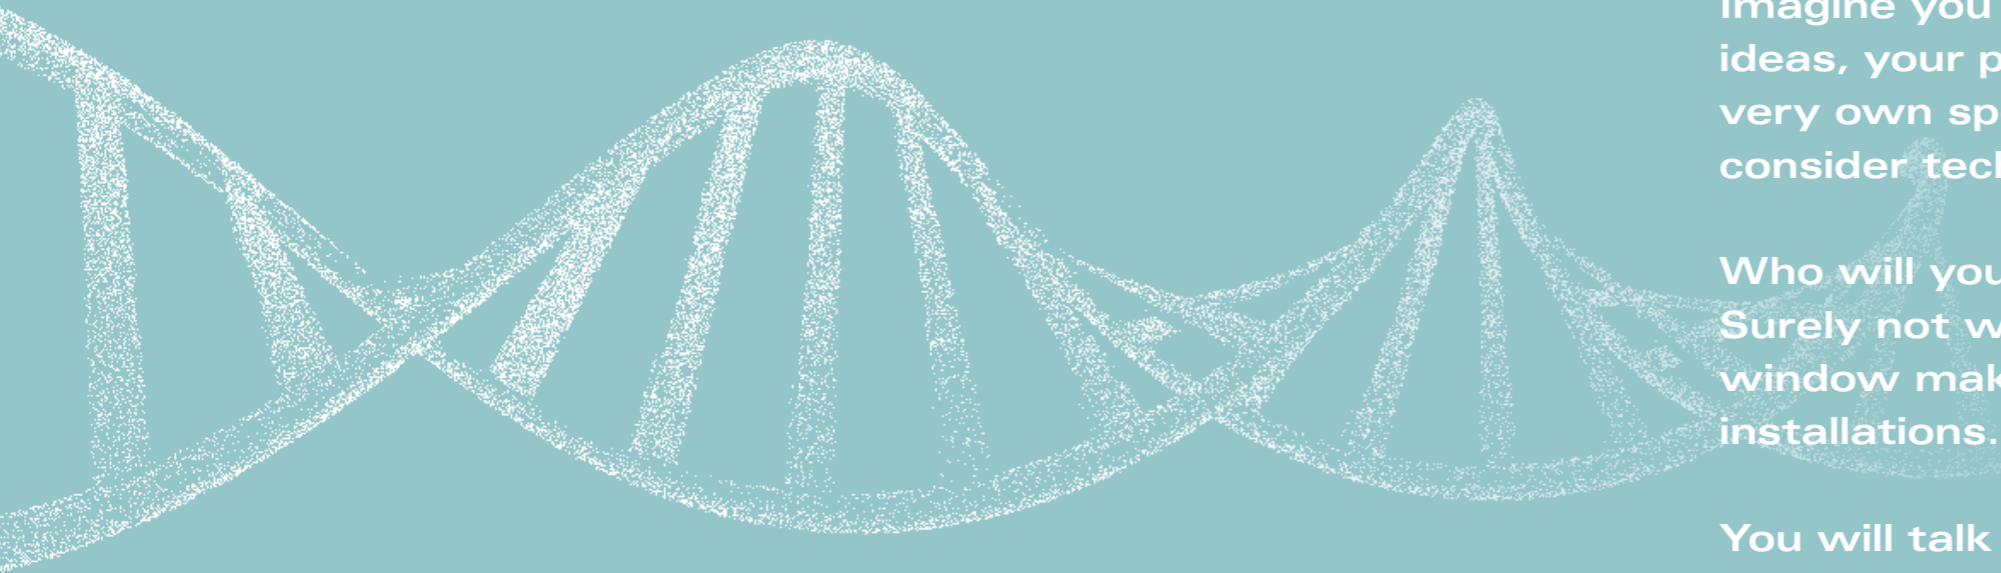

**The architect of your visions**

... YOUR FUTURE ON OUR MIND

Plant engineering redefined

Imagine you are building a house. You have your ideas, your preferences, your wishes. And your very own specifications. But you also have to consider technical, legal and static rules.

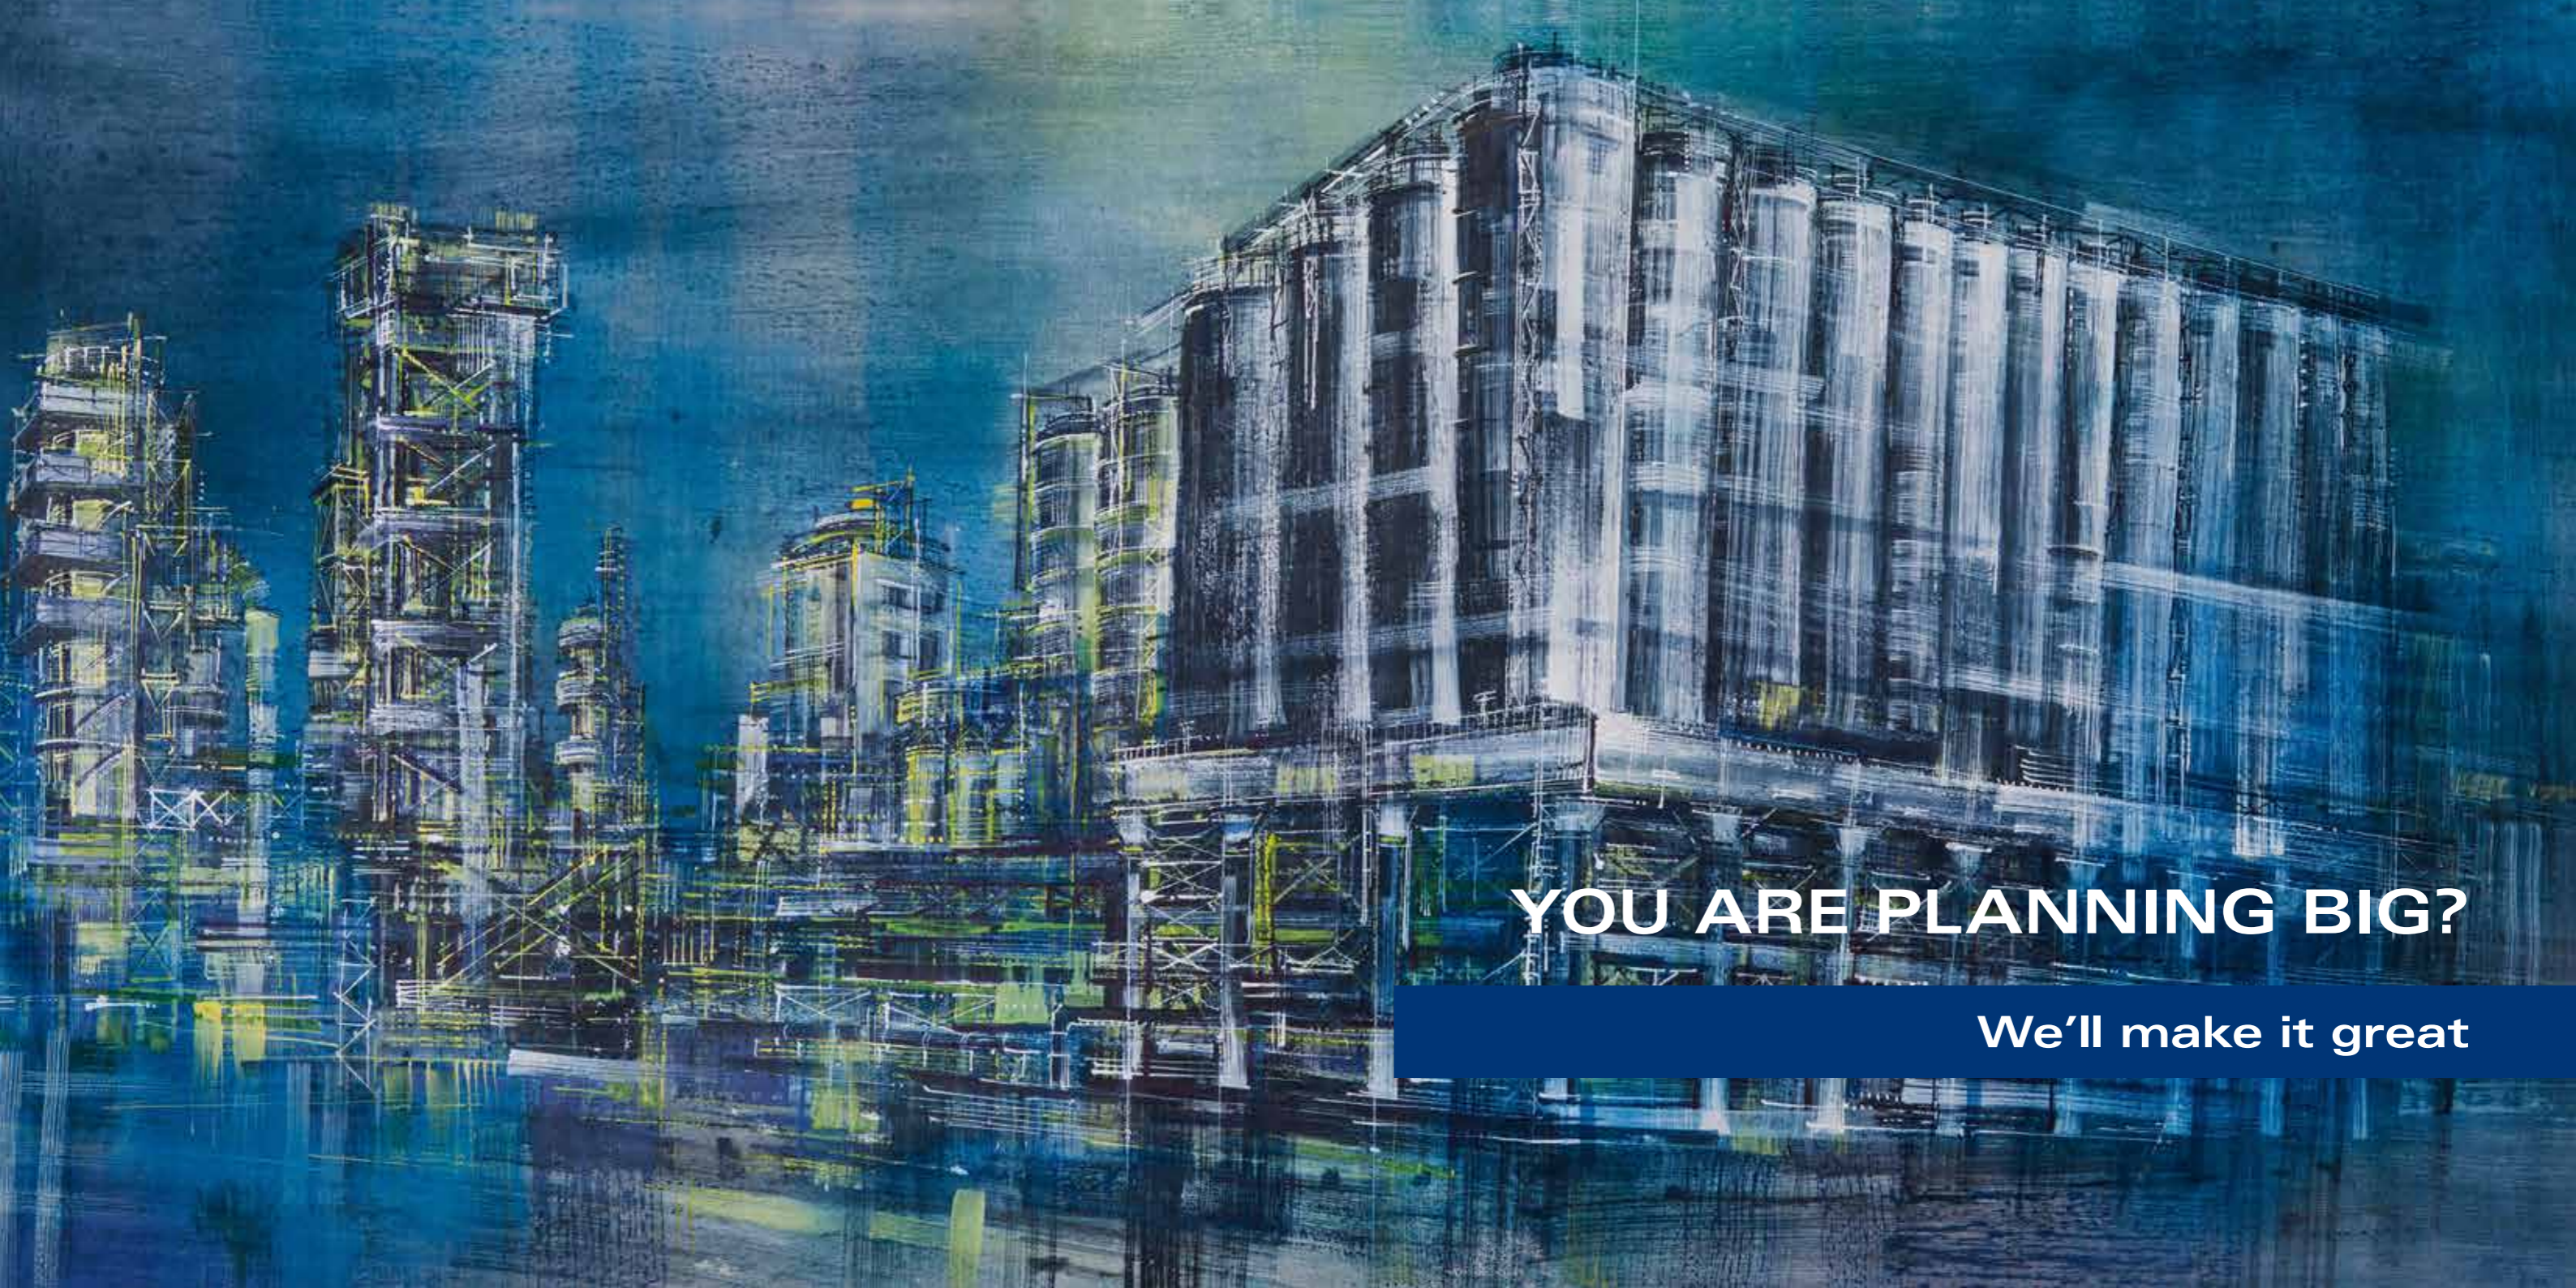

Who will you discuss your project with first? Surely not with the kitchen planner. Or the window maker. Or even the expert in sanitary installations.

You will talk to your architect first. He has got the overview of the situation and will coordinate all the work for you. He will most probably suggest you the type of window you should install. But if you prefer a different one, he will respect your wish.

You will get precisely the house you had imagined. With all the facilities and features that meet your needs. With a strong partner who takes care of everything.

Zeppelin – the architect of your visions.

**How do we get the best out of it for you?**

**YOU ARE PLANNING BIG?**

**We'll make it great**

**Create something new. Shape the future.  
Build systems. This is our common goal.  
We have redefined our role as plant designers.**

**Why? Because the world in which we live is changing. The requirements for modern plant engineering are getting more and more complex, the markets and their needs are constantly and rapidly changing. The world is getting smaller and smaller – with more and more responsibility.**

**We look at things as a whole. Plant optimization means having control over the entire system and**

**making sure all individual elements match perfectly from the very beginning.**

**It's not just about individual processes. Not just individual machines. It's all about total efficiency. It's about quick reactions and flexibility.**

**This is why we design your entire plant. We manage complex systems. We optimize from the very beginning and in the long term.**

**We see ourselves as your architect.**

Work with the potential of the entire market and not just the portfolio of individual companies. This guarantees you the best solution for your specific requirements at all times.

## INDEPENDENCE

## INNOVATION

Be a trendsetter. With innovative ideas. With intelligent technologies. With systems that think. With components that communicate. With Zeppelin.

Benefit from more than 25 years of experience in plant engineering – and a global team of experts.

## RELIABILITY

## SUCCESS

Expect more. Achieve more. Fast, efficient, reliable – schedule your success.

Think of tomorrow, today. Rely on a strong partner by your side. We will be there for you the entire service life of your plant.

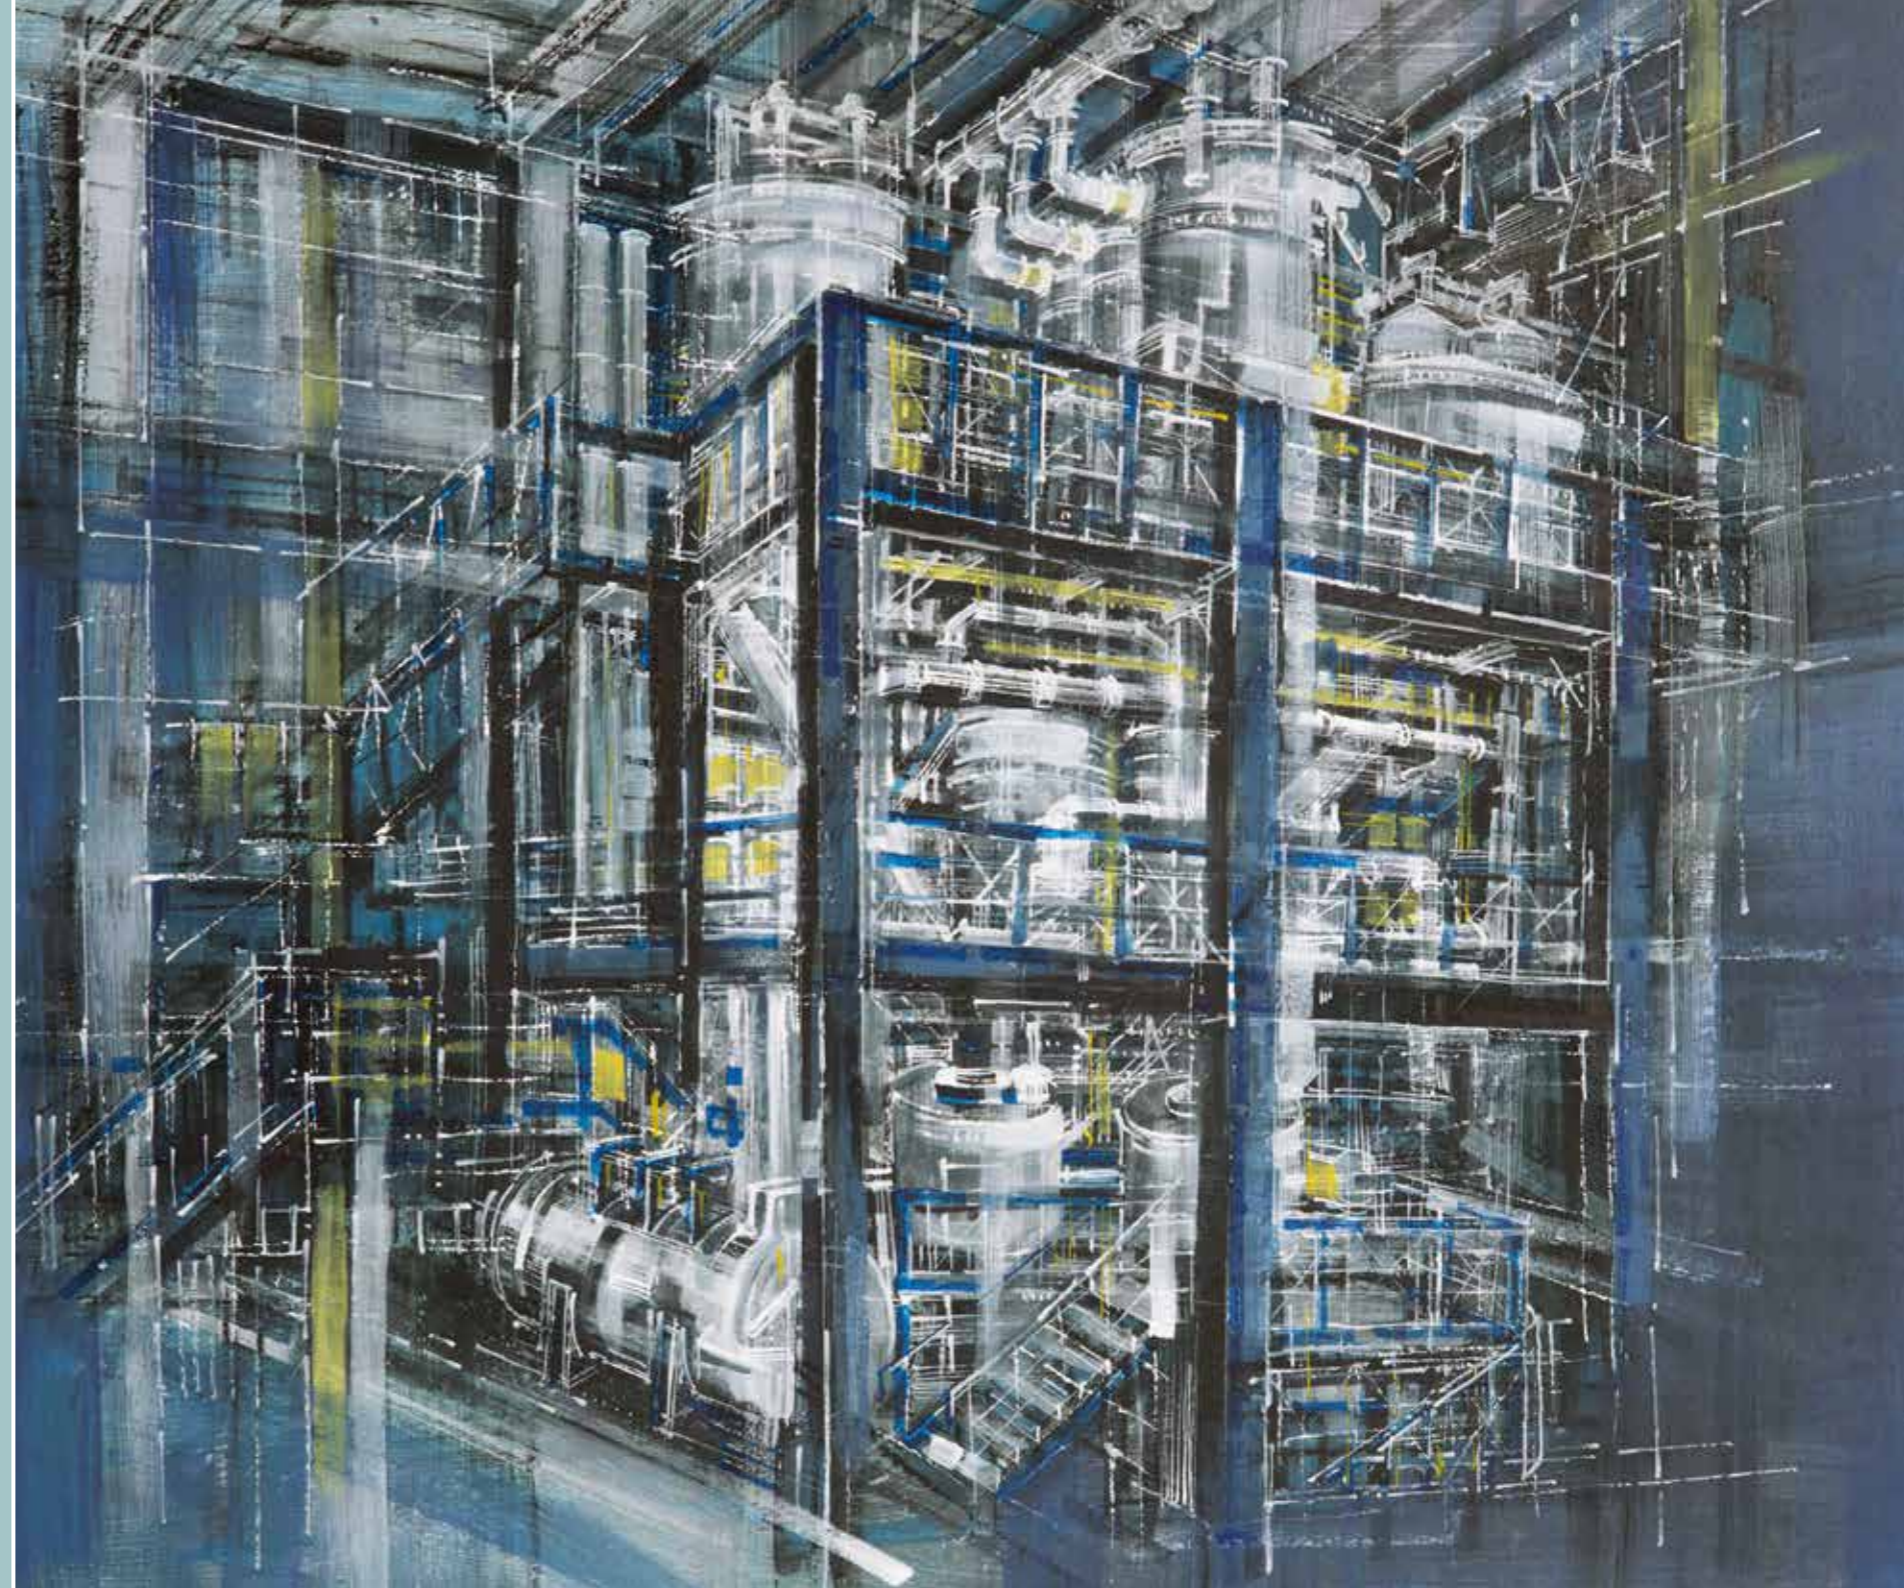

## CONFIDENCE

## LEADING EDGE

Take the lead. Be at the top of the list. Feel comfortable with the best. Gain your advantage from our solutions.

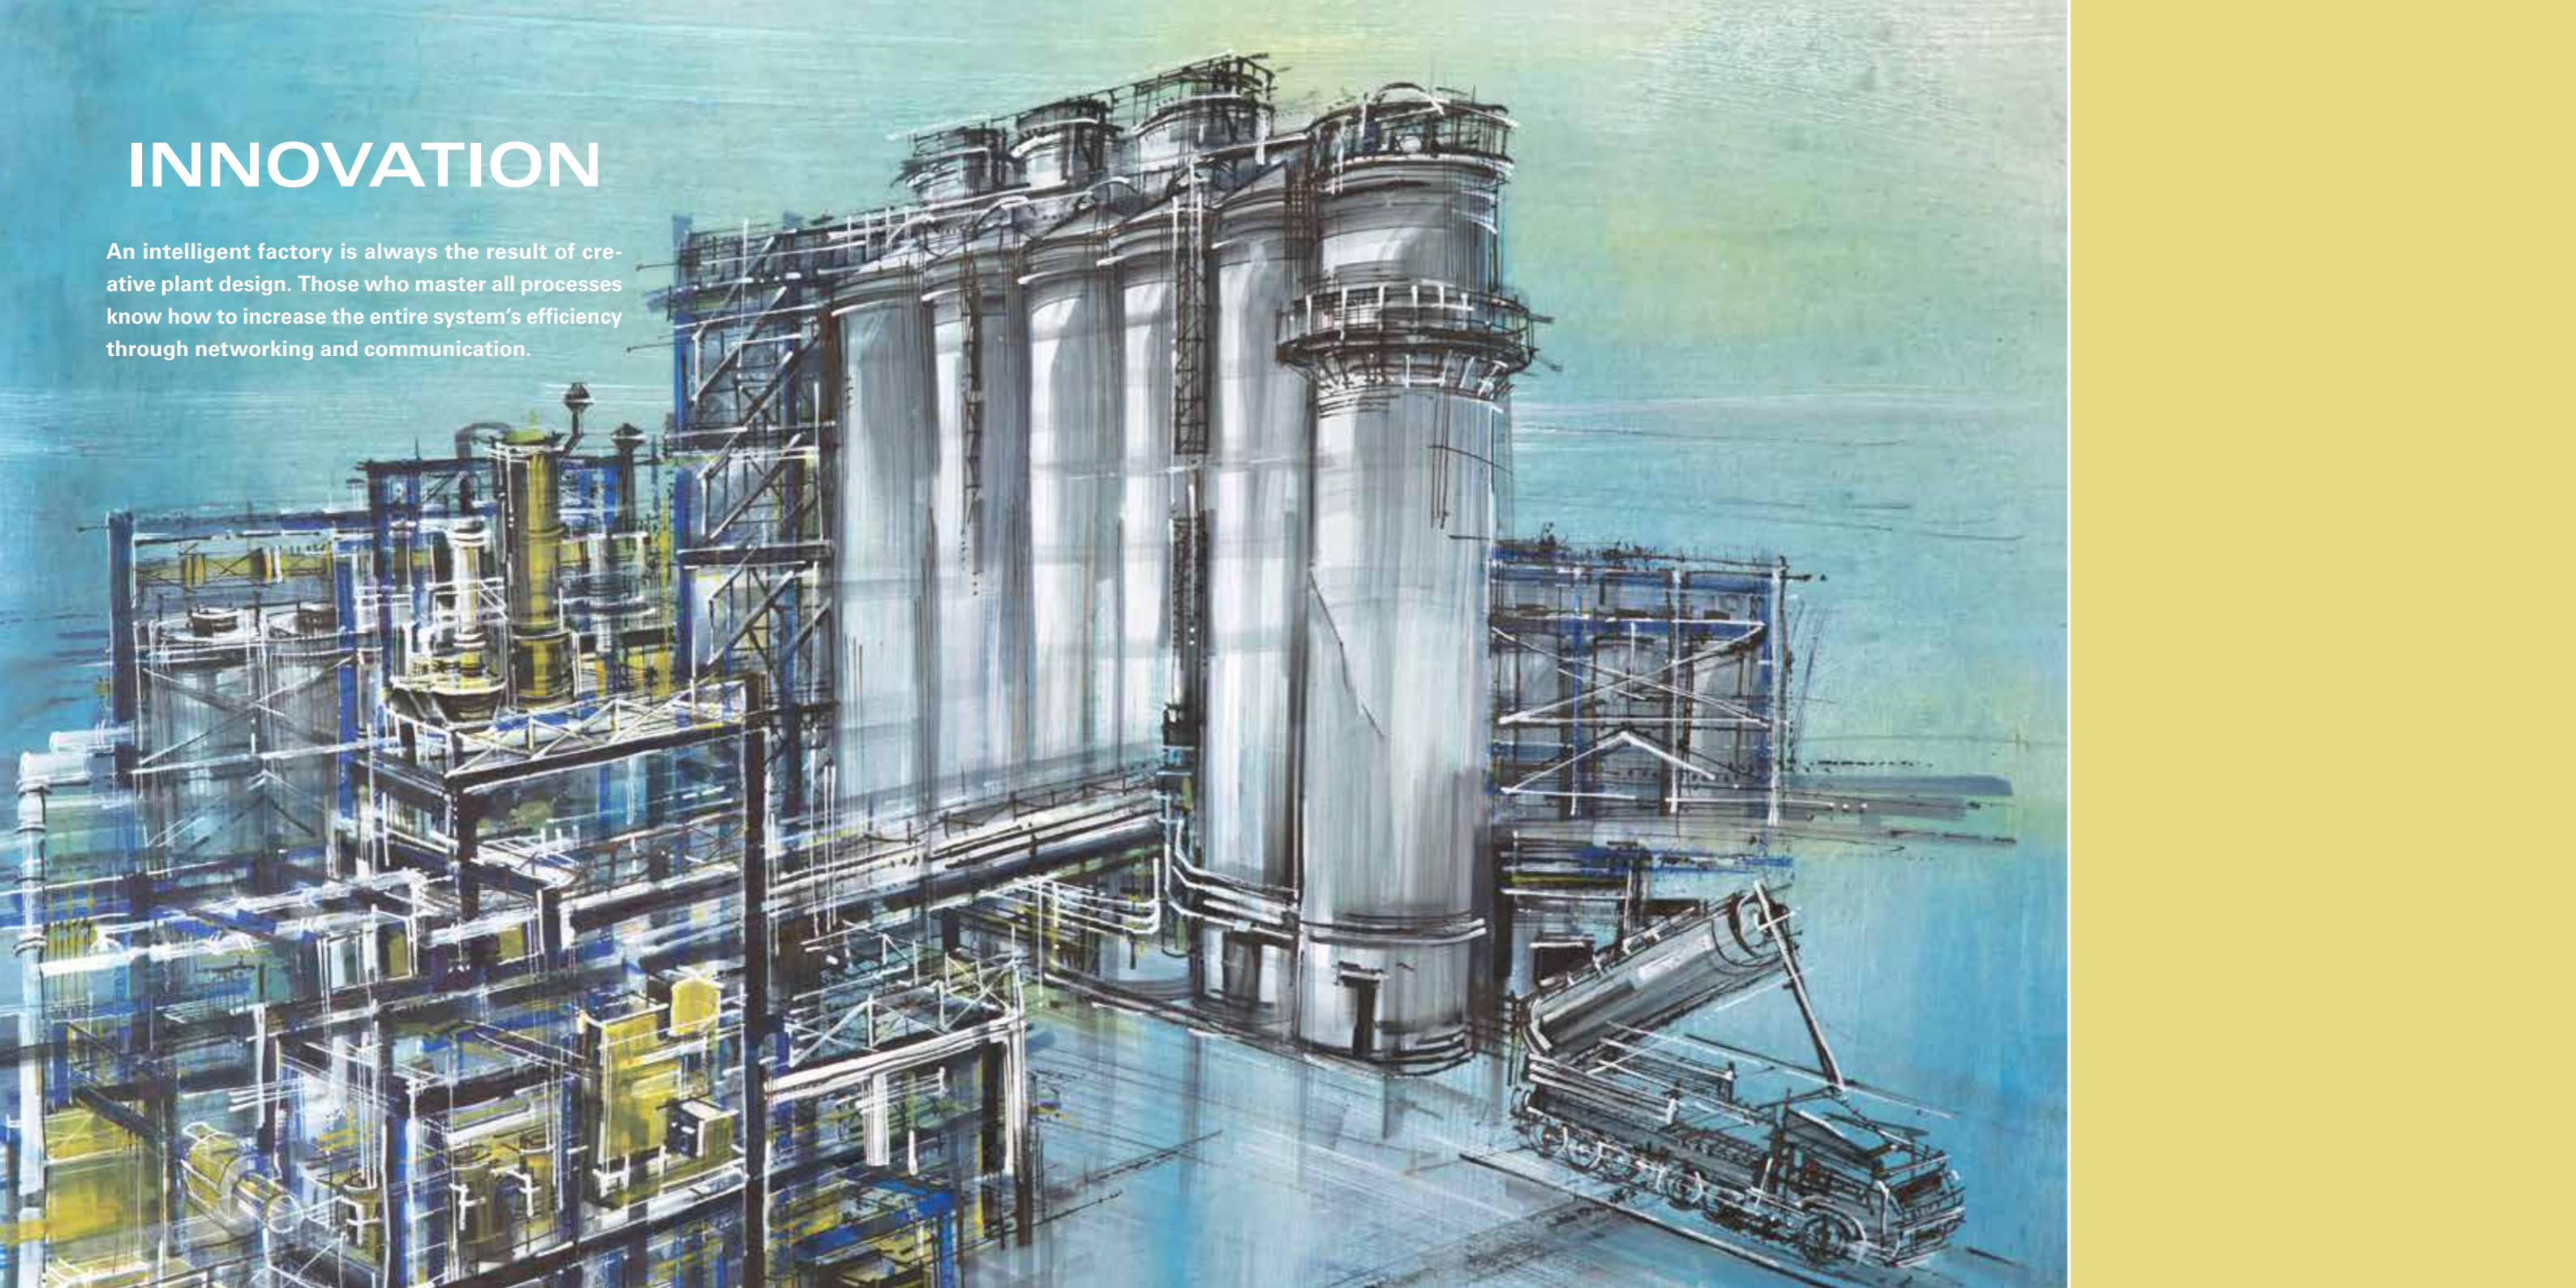

# INDEPENDENCE

A working system relies on its individual parts. It is therefore sensible to select the best solution for every process. This is the principle we follow as your architect. We integrate all processes into a perfect ensemble.

# INNOVATION

An intelligent factory is always the result of creative plant design. Those who master all processes know how to increase the entire system's efficiency through networking and communication.

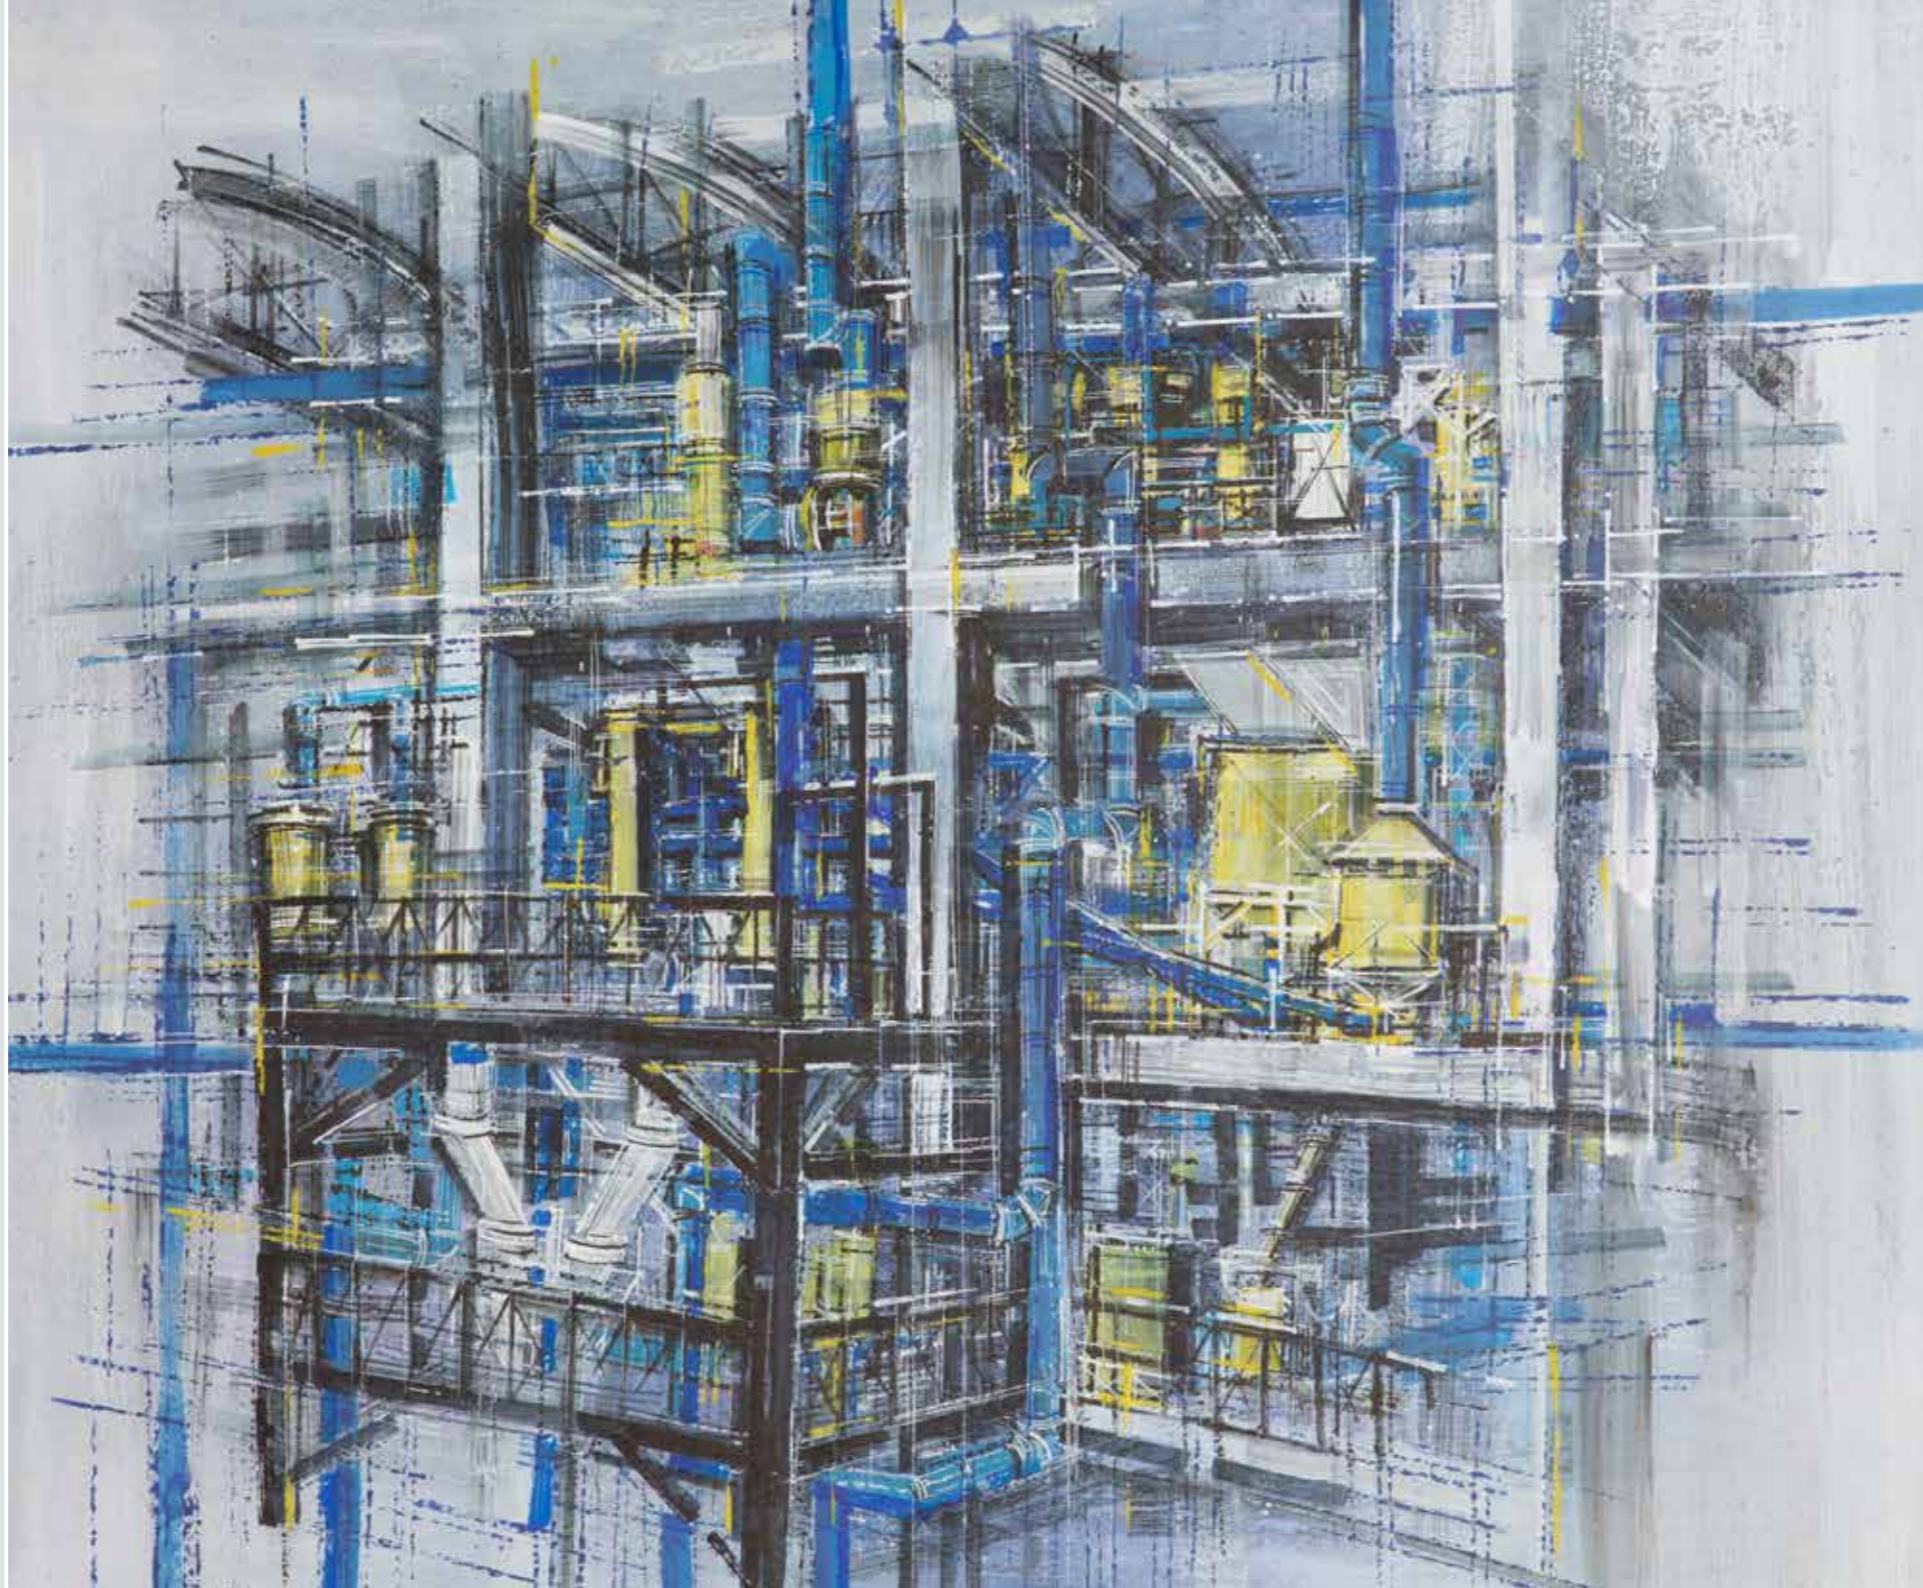

# RELIABILITY

We have built more than 2,500 plants so far. All around the world. For various different products. Always with the same result: perfection all along the line. We look forward to your challenge!

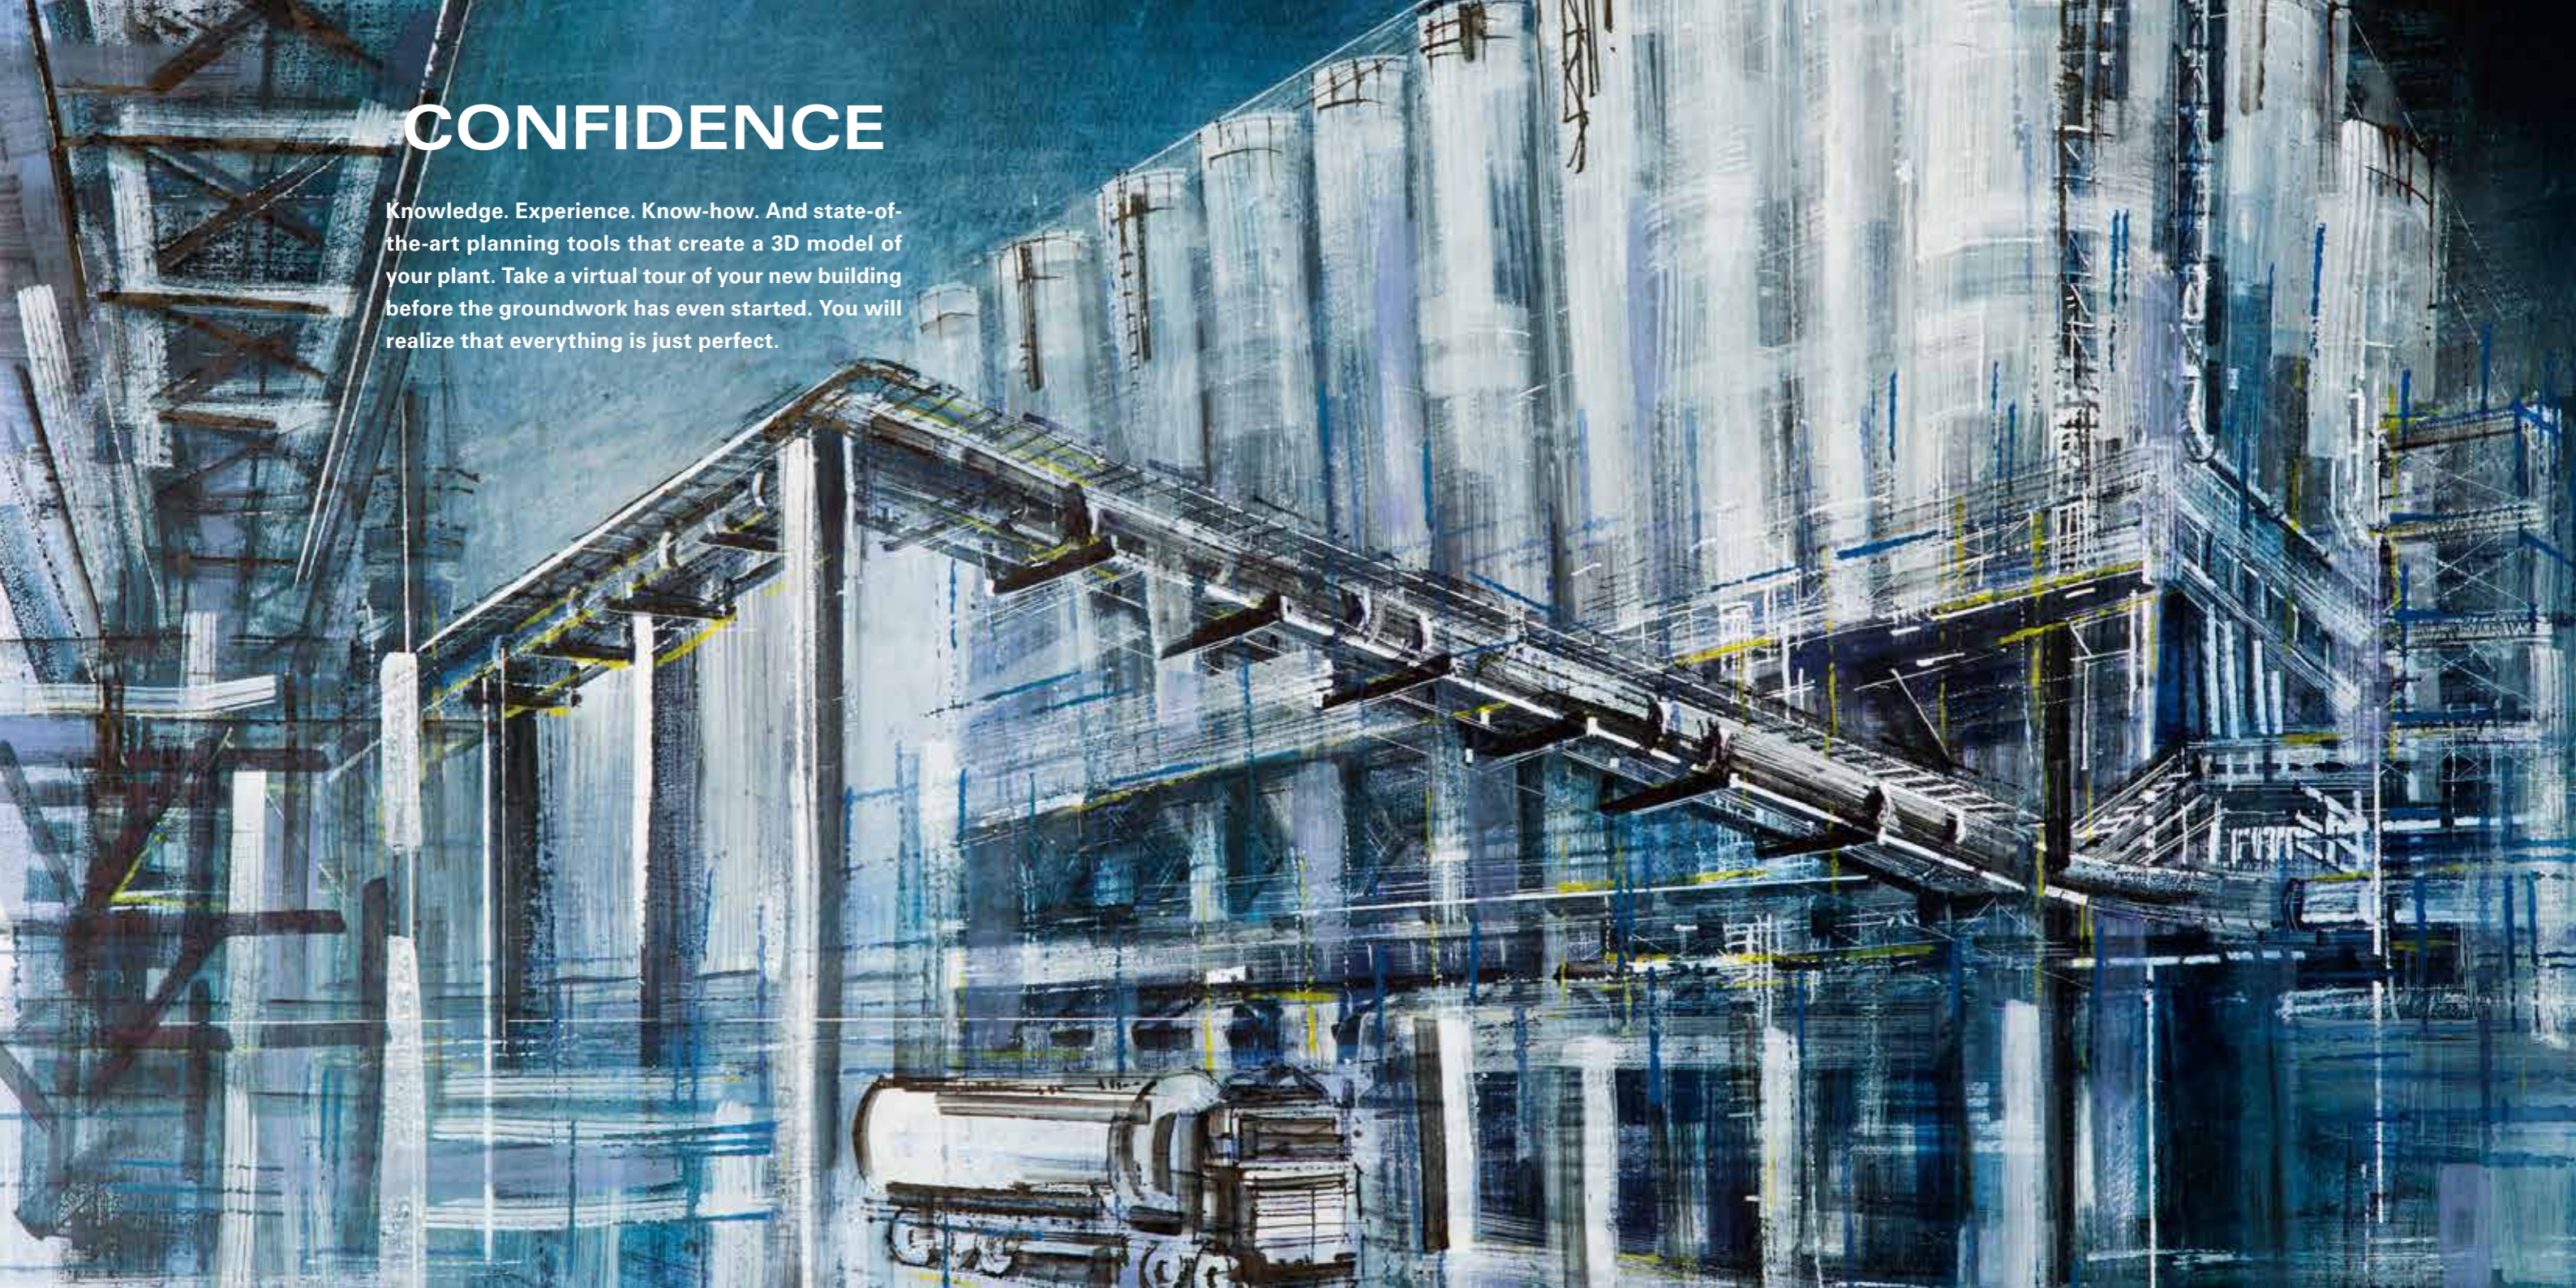

# SUCCESS

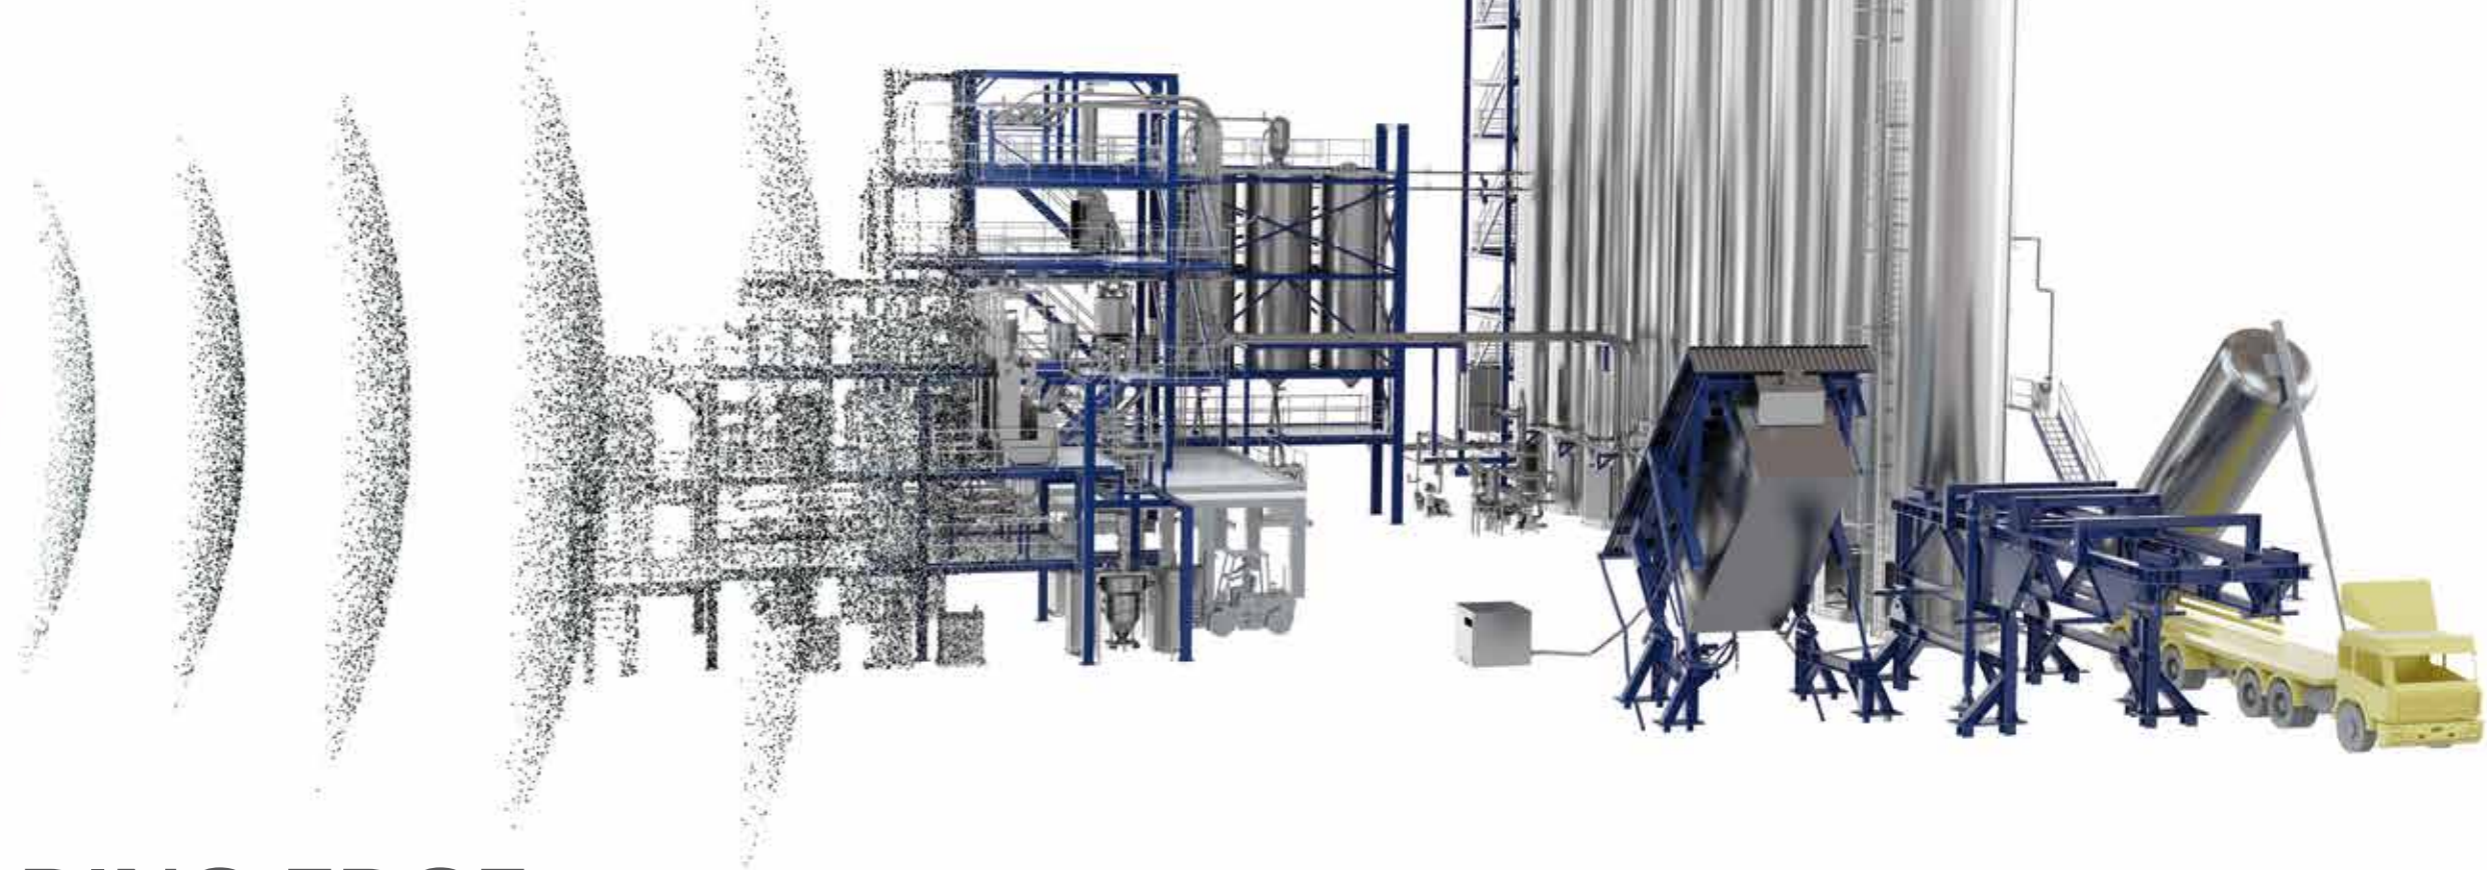

Perfect planning is half the battle. Perfect design is winning it. As architects, we design your entire system so that you achieve maximum efficiency. As plant engineers, we create the plant precisely the way you expect us to: fast, trouble-free, without interfaces.

# CONFIDENCE

Knowledge. Experience. Know-how. And state-of-the-art planning tools that create a 3D model of your plant. Take a virtual tour of your new building before the groundwork has even started. You will realize that everything is just perfect.

## LEADING EDGE

You have the imagination – we have the technology.  
You are planning big – we'll make it great. You get  
yourself an excellent architect – we ensure your  
leading edge.

The architect of your visions
